Profile

Dedicated Information Technology student with strong expertise in computer systems integration, electronics, and cutting-edge technological innovations. Proficient in programming and software engineering, with a specialized focus on developing IoT (Internet of Things) solutions. Driven by a passion for R&D, consistently aiming to design and build innovative products that bridge the gap between technical excellence and market viability.

Education

Computer Engineering Technology
Politeknik Negeri Semarang
08/2023 – Present | Semarang City

Internships

IT Support
CV. Trio Jaya Wonosobo
03/2022 – 07/2022 | Wonosobo

Achievements

System Kependudukan
- Merancang dan mengembangkan sistem kependudukan.
- Berkontribusi dalam perancangan dan menulis kode backend.

IoT Weather Monitoring & Prediction Systen
- Merancang sistem monitoring dan prediksi cuaca dengan menggabungkan sensor-sensor seperti suhu, kelembaban, tekanan udara, dan kondisi hujan/tidak hujan.
- Merakit alat transmitter (Arduino Nano) dan receiver (ESP32S3) deteksi cuaca
- Menerapkan teknology LoRa untuk transmisi data antar perangkat.

Skills

Data Structures and Algorithms

Microcontoller/Microprocessor

Soldering

Programming

Computer Tehnology

Hobbies

- Photography
- Information Technology
- DIY Electronics
- Hardware

Qualities

- Problem solving
- Critical thinking
- Attention to detail
- Creativity
